

BRANDT Turfzilla™ Systemic Fungicide

BRANDT TURFZILLA is a fast acting liquid phosphite fungicide designed to control certain diseases on turf and ornamental crops. It helps to control or suppress *Phytophthora*, *Pythium blight spp.*, *Pythium* root rot and damping off, downy mildew, and *Microdochium nivale* as well as many other plant diseases. BRANDT TURFZILLA fungicide prevents disease through multiple modes of action, thus decreasing the chance for the development of resistant pathogen strains.

Available in a liquid formulation, BRANDT TURFZILLA contains 29% phosphorous acid, or 3.3 lbs. per gallon, and represents an excellent tank mix partner choice for an integrated pest management (IPM) program. It's a flexible and cost-effective option for disease control and improving plant defense and vigor.

Key Advantages

- Highly efficient and safe formula for improved efficacy
- Controls or suppresses over 20 turf and ornamental diseases
- Increases natural production of antioxidants and anti-bacterial compounds - called phytoalexins
- Low environmental toxicity
- Offers application flexibility including compatibility with most fungicides and nutrient sources

Guaranteed Analysis

ACTIVE INGREDIENTS:

Mono- and di-potassium salts of Phosphorous Acid* 45.8%

OTHER INGREDIENTS 54.2%

TOTAL 100.0%

*Contains 5.17 lbs/gallon of the active ingredients mono- and di-potassium salts of Phosphorous Acid.

Rate Recommendations

Optimum rate of application will vary depending on treatment interval, soil properties, weather conditions, time of year, plant species and its nutrient requirements.
