

BRANDT® Sequestar® Chelated Nutrients

Protect Your Nutrient Investment

BRANDT SEQUESTAR offers a range of high quality, fully chelated EDTA, HEDTA, EDDHA and DTPA micronutrients available in liquid and dry soluble formulations. The chelation shields and protects nutrients, which prevents them from reacting and binding with other elements in the soil and other fertilizers. This ensures that nutrients are bio-available to the plant for uptake in a wide range of tank mixes, as well as pH and soil conditions.

BRANDT SEQUESTAR nutrients can withstand challenging soil conditions, such as high alkaline calcareous soils. They also offer superior tank mix compatibility and will perform in complex tank mix situations, including neutralized orthophosphate solutions.

Key Advantages of BRANDT Sequestar

- More efficient than other forms of nutrients; up to 6x more availability vs non chelated nutrients
- Ideal for use with liquid starter fertilizers and as a foliar application in difficult tank mixes
- Superior compatibility with:
 - Almost all liquid and dry fertilizers
 - Thiosulfate solutions
 - Orthophosphates, Polyphosphates
 - High pH solutions
 - Nitrogen and SRN solutions
- Application flexibility: may be mixed directly into growing media, applied as a soil drench or added to fertigation systems.
