Pyrethrum Products for Flying and Crawling Insect Pests

What is Pyrethrum?

- Pyrethrum is a natural and environmentally friendly insecticide that is derived from the dried flowers of *Chrysanthemum cinerariaefolium*. It is broad spectrum, meaning it kills a wide variety of insects, yet it has very low toxicity to mammals.
- Pyrethrins are the active chemicals found in the Pyrethrum extract that are toxic to insects.
- Pyrethrum is a good choice when treating sensitive accounts. Areas such as homes, schools, hospitals, nursing homes, food handling establishments and more.

The Advantages of Pyrethrum

- **Low mammalian toxicity** - it is one of the least toxic of domestic insecticides.
- **Broad spectrum of activity** - pyrethrum consists of a group of related compounds that can be used against flying and crawling insects in residential and commercial settings (mosquitoes, flies, cockroaches, ants, bedbugs).
- **Fast acting** - pyrethrum quickly knocks down and kills pests, attacking the nervous system of insects.
- **Environmentally friendly** - pyrethrum quickly breaks down in sunlight, leaving no residue.
- **Repellency and flushing action**
