

Sucra+Min™

Iron Sucrate 50

Sucra+Min™ IRON SUCRATE 50

Sucra-Min™ Iron Sucrate 50 (50% Fe) is an iron sucrate micronutrient produced using a unique process that combines agronomically available iron with reducing sugars under controlled conditions to yield iron carboxylate (sucrate). This proprietary prilling technology produces round uniform granules that are free-flowing and anti-caking. Sucra-Min™ Iron Sucrate 50 provides a soil dispersible source of iron that is biologically available at a relatively high nutrient concentration. Sucra-Min™ Iron Sucrate 50 is available in two particle sizes to accommodate all granular applications.

Standard Prilled Iron Sucrate (50% Fe) - 230 SGN
Mini Prilled Iron Sucrate (50% Fe) - 125 SGN

Sucra-Min™ Iron Sucrate 50 is a non-staining source of iron for the Lawn and Garden, Turf Management, Agricultural and Commercial Fertilizer industries. Sucra-Min™ Iron Sucrate 50 is effective over a wide range of pH soil conditions.

PRODUCT DATA:

Advantages

- Contains divalent, agronomically available Iron (Fe)
- Granules disperse into -325 mesh (44micron) particles upon contact with water or soil moisture
- Healthy nutrient uptake throughout the growing season
- Granule size matches major nutrients for reduced segregation
- Formulated to achieve maximum agronomic efficiency
- Effective over a wide range of pH soil conditions
- Non-Staining

**AVAILABLE IN 50 LB, 1000 OR 2000 LB
QUANTITIES AND BULK**

Physical Properties

Appearance:
Black, Free-Flowing Dispersing Granules

Bulk Density:
SGN 125 (Greens Grade): 109 lbs/cu.ft.
SGN 230 (Coarse): 105 lbs/cu.ft.

Sieve Analysis:
SGN 125 (Greens Grade): 96% -10 + 20 mesh
SGN 230 (Coarse): 96% -6 +14 mesh
