Manni-Plex[®]

Foliar Calcium and Boron Solution

Guaranteed Analysis

Calcium (Ca)	7.0%
7.0% Water soluble calcium	
Boron (B)	1.0%
1.0% Water soluble boron	

Derived from calcium chloride and boric acid.

F76

General Information

MANNI-PLEX CAL-B is designed for application to all field, row, vegetable, fruit, tree and vine crops, and turf and ornamentals for the prevention and correction of calcium and boron deficiencies when used as part of a balanced fertility program.

Rate Recommendations

Field, Row, Vegetable, Fruit, Tree and Vine Crops: Apply 1-2 quarts per acre per application throughout the growing season. At least 3 applications are recommended. More frequent applications at 1.5 quarts per acre may be needed to correct deficiencies once they occur. For pre-plant or sidedress applications, use 1-2 gallons per acre.

Ornamental Crops: Apply 1-2 quarts per 100 gallons water. Cover foliage thoroughly to point of runoff.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil test or plant analysis recommendation.

Mixing and Handling Instructions

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

Net Contents: 2.5 gallons (9.46 liters)

Density: 10.8 lb/gal @ 68°F

Net Weight: 26.7 lb (12.1 kg)

Packaged: 2 x 2.5 gallons (2 x 9.46 liters)
