

Biomite™

Sustainable Miticide Protection

BIOMITE is a miticide with a novel mode of action, which inhibits the development of resistance. This product is registered for use on apples, cucurbits, grapes, hops, nuts, pears, stone fruit, nursery and ornamentals, and is ideal for mite control in integrated pest management (IPM).

The BIOMITE Advantage

Superior Quality

- Minimum Risk
- Ideal for control in integrated pest management
- Novel mode of action which inhibits development of resistance

Proprietary Technology

- Compatible with most commonly used pesticides and fertilizers

Easy to Use

- Add BIOMITE to an empty spray tank followed by water to half the required amount
- Agitate the mixture thoroughly and then fill the tank with the remaining water
- Thorough mixing is necessary for uniform coverage
- For tank mixes, add the other pesticide or fertilizer products to the tank mix according to the directions for use on those product labels
- Typically, the least soluble products will be added first followed by the most soluble products
- Agitate mixture thoroughly and use immediately
