Proven Results™

GRIGG™ GREENPIG™

GRIGG GreenPIG is a premium pigment additive. It provides natural green turf color for up to one month and reflects potentially harmful near infrared (NIR) light, which may improve turfgrass quality and vigor. It is recommended for general use.

Key Advantages

- Highly concentrated for low use rate
- Provides great value
- Pigment is less abrasive on spray pumps than paint
- Applying pigment provides additional color and is an excellent alternative to overseeding

Application and Use

Maintenance Rate: Apply with 50-100 gallons of water [190-380 L of water].

Golf Course Putting Greens: 12-24 fl oz per acre [660 mL-1 .5L per hectare].

Golf Course Fairways: 18-32 fl oz per acre [1.25-2.25 L per hectare].

Sports Fields: 24-34 fl oz per acre [1.5-2.5 per hectare].

Optimum rate of application will vary depending on treatment interval, turfgrass species, mowing height, weather conditions and time of year. Generally, higher mowing heights and warm season turfgrasses will require higher rates to achieve the best results.

Do NOT apply to dormant or semi-dormant turfgrass.
For dormant turf, use GRIGG GreenPIG Ultra.
