

BRANDT Smart Quatro® Plus Advanced Compatibility Foliar Nutrition

BRANDT SMART QUATRO PLUS is a new advanced compatibility, high efficiency foliar designed for superior compatibility with fungicides and *select dicamba herbicides.

The 5-0-0 formulation contains a full micronutrient package, including boron, manganese, molybdenum, zinc and sulfur. It supplies high quality, readily available nutrients to plants in a highly efficient and mobile form, making it an ideal choice for in-season nutrient applications on row crops

Key Benefits of BRANDT SMART QUATRO PLUS

- Superior tank mix compatibility over a broad pH range
- Maximum nutrient mobility and efficiency, which allows for a lower application rate per acre
- Low salt index and low impurities
- Contains a proprietary, high efficiency form of boron
- Healthier plants, stress mitigation, enhanced quality and yield
- BRANDT SMART QUATRO PLUS is approved for use with Engenia[®], XtendiMax[®] with VaporGrip[®] Technology, FeXapan[™] Plus VaporGrip[®] Technology, and Enlist One[™]

Guaranteed Analysis

Nitrogen (N)
Sulfur (S) 2.0%
Boron (B) 0.5%
Manganese (Mn) 2.0%
Molybdenum (Mo) 0.05%
Zinc (Zn) 2.0%

5-0-0

Derived from urea, boric acid, manganese sulfate, sodium molybdate and zinc sulfate.

Plant Nutrient Functions

The nutrient combination in BRANDT SMART QUATRO PLUS was carefully selected and developed for specialty crops and row crops. The agronomic benefits of these nutrients include:

Boron: provides structural integrity and flexibility to the primary cell walls. It also improves vegetative and reproductive growth.

Manganese: aids in herbicide metabolism, chlorophyll formation and plant respiration. It is also critical to photosynthesis.

Molybdenum: promotes root nodulation growth and enhances nitrogen utilization.

Sulfur: aids in protein and enzyme synthesis.

Zinc: promotes root and shoot growth; helps plants withstand environmental stress.

Application Recommendations

Field, Row, Vegetable and Vine Crops: Apply 1-2 quarts per acre per application throughout the growing season. More frequent applications at 1 pint per acre may be needed to correct deficiencies once they occur.
