

GRIGG® RHIZO AIDE™ 1-0-0

GRIGG Rhizo Aide is a dry specialty product that contains tea seed meal and dolomite, which provide natural sources of nutrition. Recommended for use after aeration or similar mechanical treatment to prevent and correct nutrient deficiencies. Can be used year round, but applications from fall through spring provide optimal results.

Key Advantages

- Tea seed meal supplies nitrogen
- Dolomite is an anhydrous carbonate mineral composed of calcium magnesium carbonate that raises the pH level of acidic soils. When pH is too low, soil nutrients may become bio-unavailable to plants.
- Calcium is important for cell wall strength
- Magnesium plays a key role in chlorophyll production, which improves turf color
- Best results are achieved by watering in

Application and Use

Soil Applications: Use any conventional spreading equipment.

Tees, Greens, Fairways, Sports Fields: Initial application of 6 lb per 1000 sq ft [268 lb per acre; 300 kg per hectare]. Additional applications of 3-6 lb per 1000 sq ft [134-268 lb per acre; 150-300 kg per hectare] may be made at 4 week intervals. Light irrigation after application is recommended for best results. Do not apply during frost conditions.

Guaranteed Analysis

Total Nitrogen (N)1.0%	
1.0% Water insoluble nitrogen	
Calcium (Ca)	
Magnesium (Mg)	

Derived from tea seed meal and dolomite.

No Phosphate Fertilizer

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.
