SAFETY DATA SHEET

SECTION 1 - IDENTIFICATION

Product Identifier: BIOSIDE HS 15%

Registration Number: 63838-2

Enviro Tech Chemical Services, Inc.
500 Winmoore Way Modesto, CA 95358
(209) 581-9576 (7 AM to 5 PM, PST, Monday to Friday)

24 Hr. Emergency Tel.#: 800-424-9300

SECTION 2 - HAZARDS IDENTIFICATION

This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). These requirements differ from the classification criteria and hazard information required for safety data sheets of non-pesticide chemicals. Please see Section 15 for FIFRA labeling information.

Classification of the Substance or Mixture:
- Skin Corrosion - Category 1
- Serious Eye Damage - Category 1
- Oxidizing Liquids - Category 2
- Corrosive to Metals - Category 1
- Organic Peroxides - Type G
- Acute Toxicity - Oral Category 4
- Acute Toxicity - Dermal Category 5
- Hazardous to the Aquatic Environment, Acute Toxicity Category 2

Signal Word: DANGER

Hazard Statements:
- Causes severe skin burns and eye damage
- May intensify fire; oxidizer
- May be corrosive to metals
- Harmful if swallowed
- May be harmful in contact with skin
- Toxic to aquatic life

Precautionary Statements:
- Wear protective gloves/protective clothing/eye protection/face protection.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.
- IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
- Keep away from heat/sparks/open flames/hot surfaces - No smoking.
- Keep/Store away from clothing/…/combustible materials.
- Take any precaution to avoid mixing with combustibles.
- Keep only in original container.

SECTION 3 - COMPOSITION / INFORMATION ON INGREDIENTS

SECTION 4 - FIRST-AID MEASURES

Inhalation: Remove source of exposure or move person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER/doctor. If breathing is difficult, trained personnel should administer emergency oxygen if advised to do so by the POISON CENTER/doctor. Symptoms of pulmonary edema can be delayed up to 48 hours after exposure. If direct contact during rescue breathing poses a threat to the first aid provider, "Avoid mouth-to-mouth contact by using a barrier device."
bioside hs 15%

safety data sheet

skin contact: take off immediately contaminated clothing, shoes and leather goods (e.g. watchbands, belts). rinse skin with lukewarm, gently flowing water/shower with a flushing duration of 30 minutes. immediately call poison center/doctor. wash contaminated clothing before re-use.

eye contact: remove source of exposure or move person to fresh air. rinse eyes cautiously with lukewarm, gently flowing water for several minutes, while holding the eyelids open. remove contact lenses, if present and easy to do. continue rinsing for 30 minutes. take care not to rinse contaminated water into the unaffected eye or into the face. immediately call a poison center/doctor.

ingestion: rinse mouth. do not induce vomiting. immediately call a poison center/doctor.

most important symptoms and effects, both acute and delayed: causes severe skin burns and eye damage, burning of the mouth, throat, and esophagus.

indication of any immediate medical attention and special treatment needed: treat symptomatically

section 5 - fire-fighting measures

extinguishing media: use water spray, powder, foam, carbon dioxide.

special hazards arising from the substance or mixture: non combustible. may give off irritating or toxic fumes (or gases) in a fire.

flammability classification (osha 29 cfr 1910.106) (hazcom 2012): non flammable

hazardous combustion products: may cause fire and explosions when in contact with incompatible materials.

special protective equipment and precautions for firefighters: in the event of a fire, wear full protective clothing and niosh-approved self-contained breathing apparatus.

section 6 - accidental release measures

personal precautions, protective equipment and emergency procedures: ventilate area of leak or spill. wear appropriate personal protective equipment as specified in section 8. isolate hazard area. keep unnecessary and unprotected personnel from entering.

methods and materials for containment and cleaning up: small spills (less than 1 gallon): neutralize with soda ash or cover with dry earth, sand or other non combustible material, place into loosely covered plastic containers for later disposal. if neutralized, material can be diluted into drain. large spill: restrict access to area until completion of clean up. prevent liquid from entering sewers or waterways. stop or reduce leak if safe to do so. dike with inert material (sand, earth, etc.). collect into plastic containers for disposal. ensure adequate decontamination of tools and equipment following clean up.

special spill response procedures: collect spills in plastic containers only. prevent from entering sewers, waterways, or low areas.

section 7 - handling and storage

ventilation and engineering measures: forced air, local exhaust, or open air is adequate.

respiratory protection: in case of confined spaces or high levels encountered in the air, wear self contained breathing apparatus.

skin protection: wear chemical resistant gloves and chemical resistant garments when handling, wash garments before re-use.

eye/face protection: wear chemical goggles; also wear a face shield if splashing hazard exists.

other protective equipment: eye wash facility and emergency shower should be in close proximity.

general hygiene conditions: do not eat, drink or smoke when using this product. wash thoroughly after handling. remove and wash contaminated clothing before re-use. handle in accordance with good industry hygiene and safety practice.

section 8 - exposure controls / personal protection

appearance: clear colorless liquid

odor: vinegar odor

ph: <1 (1:10)

melting/freezing point: no information available

initial boiling point and boiling range: no information available

flash point: 200° f / 93 ° c

flammability (solid, gas): non flammable

vapor pressure (mm hg): 22

specific gravity: 1.14 g/mL

solubility in water: complete

auto ignition temperature: 518° f / 270° c

### SECTION 10 - STABILITY AND REACTIVITY

**Reactivity:** Reactive with bases, metals, reducing agents and combustible materials

**Chemical Stability:** Stable for up to 1 year when stored under normal conditions.

**Possibility of Hazardous Reactions:** May react with incompatible materials

**Conditions to Avoid:** Incompatible materials and high temperatures

**Incompatible Materials:** Reactive with bases, metals, reducing agents and combustible materials

**Hazardous Decomposition Products:** Oxygen which supports combustion.

### SECTION 11 - TOXICOLOGICAL INFORMATION

**Information on likely routes of exposure:**

- Routes of entry - inhalation: YES
- Routes of entry - skin & eye: YES
- Routes of entry - ingestion: YES
- Routes of entry - skin absorption: NO

**Potential Health Effects:**

- **Signs and symptoms of short term (acute) exposure:**
  - **Inhalation:** Breathing in mists or aerosols may produce respiratory irritation.
  - **Ingestion:** Swallowing can result in nausea, vomiting, diarrhea, abdominal pain and chemical burns to the gastrointestinal tract.
  - **Skin:** Contact with skin will result in severe irritation. Corrosive to skin - may cause skin burns.
  - **Eye:** A severe eye irritant. Corrosive to eyes; contact can cause corneal burns. Contamination of eyes can result in permanent injury.

**Potential Chronic Health Effects:**

- **Mutagenicity:** No known mutagenic effects
- **Carcinogenicity:** Not a known carcinogen or tumorigen
- **Reproductive effects:** No known reproductive effects
- **Sensitization to material:** No expected to cause sensitization
- **Specific target organ effects:** No information available
- **Medical conditions aggravated by overexposure:** No information available

**Toxicological data:** The calculated ATE values for this mixture are:

- ATE oral = 494 mg/kg
- ATE dermal = 2281 mg/kg
- ATE inhalation = >20 mg/L or >20,000 ppm

### SECTION 12 - ECOLOGICAL INFORMATION

**Ecotoxicity:** May harmful to aquatic life.

**Persistence and degradability:** Not expected to persist. Expected to readily biodegrade.

**Bioaccumulation potential:** Not expected to bio accumulate.

**Mobility in soil:** No information available

### SECTION 13 - DISPOSAL CONSIDERATIONS

**Handling for disposal:** Do not contaminate water, food, or feed by storage and/or disposal. When handling refer to protective measures listed in sections 7 and 8. Empty residue from containers, rinse container well.

**Method of disposal:** Dispose of in accordance with all applicable federal, state, provincial and local regulations. Contact your local, state, provincial or federal environmental agency for specific rules.

**RCRA:** If product becomes a waste, it does meet the criteria of a hazardous waste as defined by the US EPA, because of: Corrosivity D002
SAFETY DATA SHEET

SECTION 14 - TRANSPORTATION INFORMATION

Certain shipping modes or package sizes may have exceptions from the transport regulations. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.

Please note the GHS and DOT Standards are NOT identical and therefore can have varying classifications.

US 49 CFR/DOT/ATA/IMDG Information:
UN No.: 3109
UN Proper Shipping Name: Organic peroxide type F, liquid
Transportation hazard class(es): 5.2 (8)
Packing Group: II

Environmental hazards: Not a Marine Pollutant

SECTION 15 - REGULATORY INFORMATION

FIFRA Classification/Typical Hazard Labeling, as outlined in EPA Label Review Manual

US Federal Information:
TSCA information: All components are listed on the TSCA inventory.
US CERCLA Reportable quantity (Hazardous substance RQ): Acetic acid has a RQ of approximately 31000 lbs. of as is chemical.
US EPCRA Reportable quantity (Extremely hazardous substance RQ): Peracetic acid has a RQ of approximately 3500 lbs. of as is chemical.
SARA Title III: Reactivity Hazard, Acute Health Hazard

International Information: WHMIS: Class C: Oxidizing material. Class E: Corrosive material
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations.
