

BRANDT Manni-Plex[®] Si Advanced Foliar Nutrition

BRANDT MANNI-PLEX SI is a proprietary foliar supplement with 10% silicon dioxide that provides highly mobile and available silicon. It is an excellent tool for preventing and correcting silicon deficiencies, and enhancing overall turf health. Silicon helps reinforce cell walls, strengthening and promoting upright stature.

Applying BRANDT MANNI-PLEX SI helps ensure that adequate levels of silicon are present to increase root development and mass. It also helps improve resistance to silicon deficiency related fungal infections and more.

Key Benefits of BRANDT MANNI-PLEX SI

- More efficient than other forms of Si
- Low molecular weight and particle form allows more Si to penetrate plant leaves
- Proprietary formulation coats leaves and adheres to the leaf surface, making it available to the plant longer
- Ready-to-use liquid formulation can be tank mixed with most fungicides, insecticides, and PGR's
- Si is essential for the plant to increase tolerance to heat, cold, drought, and salinity

The molecular shape and structure of MANNI-PLEX foliar nutrients allows the plant to absorb more nutrients at a faster rate.

This products may only be sold in states where registered or where registration is not required. For information regarding product availability in your area, please contact Brandt Consolidated, Inc. The marks BRANDT and Manni-Plex are registered trademarks of BRANDT Consolidated, Inc.

Guaranteed Analysis

Iron (Fe)	1.0%
1% Chelated iron	

Derived from iron EDTA

ALSO CONTAINS NON-PLANT FOOD INGREDIENT:

10.0% Silicon Dioxide (SiO₂) derived from sodium silicate.

Application and Use

Turf: For professional use only, apply to actively growing turf. For best results apply early morning or late afternoon.

Green & Tees: 0.5-1 fl oz per 1,000 sq ft.

Fairways & Sports Turf: 1.5-3 pints per acre.

Overseeding: 0.5 fl oz per 1,000 sq ft after germination.

Sod Installation: 0.5 fl oz per 1,000 sq ft at installation.
