

BRANDT® Smart K B

Advanced Compatibility Foliar Nutrition

BRANDT SMART K B is a new high efficiency foliar potassium formulation in the top-selling BRANDT® SMART SYSTEM® product line. It is a 2-0-16 formulation with a spike of boron and is ideal for in-season nutrient applications on specialty crops and row crops.

Benefits of Foliar Feeding

Foliar feeding is one of the most efficient ways to supply nutrition to crops during critical growth stages. Applying nutrition to plant leaves allows the plant to immediately absorb nutrients, which promotes better plant uptake, better overall plant health and increased yield potential.

Key Benefits of BRANDT SMART K B

BRANDT SMART K B provides high quality, readily available nutrients to plants in a highly efficient and mobile form. **It is also formulated for superior tank mix compatibility with fungicides, insecticides, glyphosate and select dicamba herbicides.**

- Superior tank mix compatibility over a broad pH range
- Maximum nutrient mobility and efficiency, which allows for a lower application rate per acre
- Low salt index and low impurities
- Contains a proprietary, high efficiency form of boron
- Healthier plants, stress mitigation, enhanced quality and yield

BRANDT SMART K B is approved for use with:

XtendiMax®	Engenia®	Enlist Duo®	Enlist One®
■*	■	■	■

*with approved DRA

Guaranteed Analysis

2-0-16

Nitrogen (N)	2.0%
2.0% Urea nitrogen	
Soluble Potash (K ₂ O)	16.0%
Boron (B)	2.5%
Molybdenum (Mo)	0.2%

Derived from urea, potassium borate and sodium molybdate

Plant Nutrient Functions

The nutrient combination in BRANDT SMART K B was carefully selected and developed for specialty crops and row crops. The agronomic benefits of these nutrients include:

Boron: essential to new growth, pollination and reproduction. Stabilizes cell walls, which provides plant structure and integrity. Also aids in nitrogen assimilation and root nodulation formation, which enhances nitrogen uptake and utilization.

Potassium: assists with drought tolerance, nodulation, lodging resistance and defense against insects and diseases. Critical to high yields.

Application Recommendations

Field, Row, Vegetable and Vine Crops: Apply 1-2 quarts per acre per application throughout the growing season. More frequent applications at 1 pint per acre may be needed to correct deficiencies once they occur.
