

BRANDT A+™

Spreader/Activator/ Drift Reduction Agent

BRANDT A+ is a proprietary spray-tank adjuvant, containing a novel non-ionic surfactant and unique drift reduction technology. BRANDT A+ improves spray quality by enhancing deposition and surface activity properties that promote superior wetting, improved uptake, and retention of many agrochemical sprays.

Key Benefits of BRANDT A+

- Multi-functional cost effective tool: use as a non-ionic surfactant, or as a replacement for crop-oil concentrate or methylated seed oil adjuvants, or for drift reduction.
- Will not increase driftable fines compared to standard non-ionic surfactants.
- Consistently and statistically enhances uptake and performance of many pesticides such as glyphosate.
- Optimum NIS and drift control loads usually achieved at 1 quart per 100 gallons of spray solution or 1-2 pints per acre when used as a COC or MSO adjuvant replacement.
- Does not contain oil so it can be used within safe pesticide label guidelines that caution against the use of extra oil in the spray tank.
- Certified under the Council of Producers and Distributors of Agrotechnology's Adjuvant Certification Program and is OMRI listed for organic use.

NOT FOR AQUATIC USE IN WASHINGTON

This product may only be sold in states where registered or where registration is not required. For information regarding product availability in your area, please contact Brandt Consolidated, Inc.

Principle Functioning Agents

Ethoxylated sorbitan fatty acid ester, mono-and diglycerides of C8-C18 fatty acids, Propylene Glycol	93%
Constituents Ineffective as Spray Adjuvant	7%
Total	100%

Surfactant content 93%

Application Recommendations

Specific use rates will vary with conditions of application such as: water hardness; application method; equipment; spray droplet size; spray nozzle selection; or condition, size of foliage.

Ground: (10-300 GPA spray volume)

Use BRANDT A+ at the rate of 4-32 fluid ounces per 100 gallons of spray solution when used as a non-ionic surfactant/penetrant. Use 1-2 pints per acre when used as a replacement for crop oil concentrate or methylated seed oil adjuvants.

Aerial: (or with spray volumes under 10 GPA):

Use BRANDT A+ at the rate of 2-8 fluid ounces per acre.

Drift Reduction:

Use BRANDT A+ at the rate of 2-3 pints per 100 gallons of spray solution.
