

TresOil®

Sustainable Fungicide, Insecticide and Miticide

TresOil controls pests through suffocation of the eggs, larvae and nymphs of insects and adults of soft bodied insects. This product controls a wide range of mites and insects in the egg stage such as: spider and eriophyid mites, armored and soft scales, mealy bugs, psyllids, whiteflies, aphids and more. TresOil can be used in many facilities such as: a greenhouse, shade house, industrial and residential planting, and field planting.

Key Benefits

- Uniform coverage to smother pests without causing burn or stress to plants
- Effective in high or low pressure applications
- Excellent compatibility with pesticides labeled for use with oil
- Requires much less agitation to maintain homogenous mix
- Penetrates dense spots in canopy
- Compatible with most commonly used insecticides and fungicides

Mixing Instructions

Add sufficient water to the mixing tank to allow proper agitation. Add the correct amount of TresOil to the tank. Maintain agitation until solution is used. If other pesticides are to be added, do so after TresOil has been thoroughly mixed.

Active Ingredients

Petroleum Oil	80%
Other Ingredients	20%

*Contains petroleum distillates, 92% unsulfonated residue of mineral oil
