

Dri-Clean® Herbicide

High Concentrate, Selective Weed Killer

For control of many broadleaf weeds in grape vineyards, apple, pear, stone fruit and nut orchards. Also for non-crop use in ornamental turf, and non-cropland areas.

The DRI-CLEAN® HERBICIDE Advantage

Superior Quality

- Low volatile dry formulation of 2,4-D Amine Salt
- Packaged in easy to handle and mix water soluble bag
- No container disposal
- No closed system required
- Tank mixes well with Glyphosate products
- Highly effective weed control within a few days
- Nearly twice as active as liquid 2,4-D formulations
- One 9 oz. bag is equal to 1 pt. liquid 2,4-D 4 lb. Amine

Spray Drift Reduction

- A variety of factors including weather conditions and method of application can influence pesticide drift
- The applicator must evaluate all factors and make appropriate adjustments when applying this product
 - Droplet Size
 - Wind Speed
 - Temperature Inversions
 - Susceptible Plants
 - Other State and Local Requirements
 - Equipment

| *2,4-Dichlorophenoxyacetic Acid | 80.5% |

Application Rates and Tips

Generally the lower dosages given will be satisfactory for young, succulent growth of sensitive weed species

For less sensitive species and under conditions where control is more difficult, the higher dosages will be needed

Apply this product during warm weather when weeds are young and growing actively

Use enough spray volume for uniform coverage by ground or air application

For use on grapes, nut orchards, apples, stone fruit, pears and citrus

Use 18 to 27 ounces of Dri-Clean® Herbicide in 10 to 100 gallons of water to treat one acre

For band or spot treatment calculate rates according to the actual portion of acre treated

Apply as a directed spray onto weeds to point of runoff when weeds are young and actively growing

Repeat applications through the growing and dormant season as needed
