

# BRANDT® Converge SRN 30-0-0

Slow Release Nitrogen Fertilizer

30-0-0

## Guaranteed Analysis

Total Nitrogen (N) ..... 30.0%  
12.0% Urea nitrogen  
18.0% Other water soluble nitrogen\*

Derived from triazone, methylene urea and urea.

F76

\* 18% Slowly available nitrogen from triazone and methylene urea.

## General Information

BRANDT CONVERGE SRN 30-0-0 is a slow release nitrogen product that is uniquely engineered to obtain constant growth pattern of plants and improve root development and overall plant health. It utilizes the microorganisms in the soil to release the nitrogen at the proper rate for the plants. There are minimum losses of  $\text{NO}_2$  and  $\text{NH}_3$  from the soil, which reduces the total nitrogen needs without sacrificing performance, yield and health of the plant. This product is non-burning, so foliar contact will not harm the plants.

## Rate Recommendations

For professional use, apply every 14-28 days, as needed.

**Fine Turf (Warm or Cool Season Turfgrasses), Putting Greens and Tees**

*Maintenance:* 9-12 fl. oz. per 1,000 sq ft or 3-4 gallons per acre.

*Overseeding:* 6-9 fl. oz. per 1,000 sq ft or 2-3 gallons per acre, applied every 14-21 days after germination and plants have reached the 3 tiller phase. Most effective when used as part of an overall overseeding nutritional program.

**Fairways, Sports Turf and Lawns**

*Maintenance:* 9-18 fl. oz. per 1,000 sq ft or 3-6 gallons per acre.

*Overseeding:* 6-9 fl. oz. per 1,000 sq ft or 2-3 gallons per acre, applied every 14-21 days after germination and plants have reached the 3 tiller phase. Most effective when used as part of an overall overseeding nutritional program.

## Foliar Application

Apply a foliar spray early in the morning or late in the day for best results. Allow foliar sprays to dry thoroughly before irrigation to insure even foliar uptake.

## Ornamental Plants

*Tree and shrub maintenance:* For deep root feeding inject 2-3 gallons per 100 gallons of water per inch of trunk diameter at chest height. Apply 2-5 gallons per 100 gallons of water as a drench. Apply drench throughout the year or during drought stress conditions.

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

## Mixing and Handling Instructions

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

Information about the components of this lot of fertilizer may be obtained by writing to BRANDT Consolidated, Inc. and giving the lot number which is found on the container or label.

**Precautionary Statements:** Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.
