

BRANDT® EnzUp® Grain ST

Enzyme Seed Treatment with Zinc

BRANDT EnzUp Grain ST contains a proprietary enzyme technology that enhances seed development to get the crop off to a fast and healthy start. This formulation is designed for use as a seed treatment on all soil types and may be used in band or in furrow fertilizer applications.

BRANDT EnzUp Grain ST is compatible with most fungicides and insecticide seed treatments. It may also be applied as an over-treatment if preferred.

Patent Pending Enzyme Technology

BRANDT EnzUp Grain ST rapidly disperses a high volume of two enzymes into the soil, which interacts with the outermost layer of the roots, the mucilage layer, and creates a draw for more water and nutrients towards plant roots. The enzymes in this formulation have been stabilized using a proprietary, patent pending process that speeds up plant response and efficacy, making it more effective than other enzymes and microbial products.

Guaranteed Analysis

Zinc (Zn)..... 4.0%
4.0% Chelated zinc

Derived from zinc EDTA.

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

Lipase..... 32×10^3 μ Units/mL
Mannanase..... 16×10^6 μ Units/mL

Rate Recommendations:

Seed Treatment	In-Furrow/Banded
Wheat and Rice: 2 fl oz/cwt	Field and Row Crops: 2 fl oz/ac
Corn: 4 fl oz per unit of seed	Potato: 4-6 fl oz/ac

- ✓ May be mixed with and applied with fungicide and insecticides
- ✓ Can be applied as an overcoat treatment
- ✓ Compatible with most inoculants and microbial based products

Benefits of Zn

BRANDT EnzUp Grain ST provides high quality, readily available Zn to the seed. This promotes root and shoot growth and helps plants withstand environmental stress.
