

BRANDT® Nurture

Slow Release Nitrogen Fertilizer

30-0-0

Guaranteed Analysis

Total Nitrogen (N)	30.0%
12.0% Urea nitrogen	
18.0% Other water soluble nitrogen*	

Derived from triazone, methylene urea and urea.

F76

* 18% Slowly available nitrogen from triazone and methylene urea.

General Information

BRANDT NURTURE is a slow release nitrogen product that is uniquely engineered to obtain constant growth pattern of plants and improve root development. It utilizes the microorganisms in the soil to release the nitrogen at the proper rate for the plants.

Rate Recommendations

FIELD AND ROW CROPS: Apply 1-3 gallons per acre before crops attain full canopy and then 1-5 gallons per acre as needed.

ALFALFA: Apply 1 quart per acre as needed.

SORGHUM/MILO: Apply prior to heading. Applications of 2 quarts per acre are generally recommended, but rates up to 8 quarts of BRANDT NURTURE 30L with a minimum of 5 gallons of water per acre to ensure complete coverage may be used in ground applications. When aerially applied, 2-6 quarts with a minimum of 3 gallons of water may be used. Rates in excess of 2 quarts per acre may cause cosmetic leaf burn under conditions of high temperatures and relative humidity.

VEGETABLE CROPS: Apply 1-3 gallons per acre for most vegetable crops at early bloom and repeat approximately 4 weeks after bloom application. Rates as high as 5 gallons per acre may be used on crucifers.

CITRUS: Apply 1-10 gallons per acre as needed.

DECIDUOUS FRUIT AND NUT CROPS Apply 1-1.5 gallons per acre from bud swell to early bloom, 1-5 gallons post-bloom to pre-harvest, and 5-10 gallons post-harvest to leaf drop.

GRAPES: Apply 1-2 gallons per acre as needed. Rates as high as 10 gallons per acre may be used post-harvest.

STRAWBERRIES: 1-3 gallons per acre when early bloom and repeat in 14-21 days.

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

Mixing and Handling Instructions

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

Information about the components of this lot of fertilizer may be obtained by writing to BRANDT Consolidated, Inc. and giving the lot number which is found on the container or label.

Precautionary Statements: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.
