

Manni-Plex® Total Turf

Build Stronger, Healthier Turf

Applying the right combination of nutrients produces outstanding greens and tees. MANNI-PLEX foliar nutrients were designed to deliver nutrition quickly and efficiently. Their small molecular size and weight helps get more nutrition into turf growth points for better results.

Key Benefits of MANNI-PLEX TOTAL TURF

Efficiency

- The gold standard of turf nutrition. Quickly supplies readily available N, Mg, Fe, Mn and Zn to turf
- Proprietary formulation coats leaves and sticks to the surface, making nutrients available longer

Effectiveness

- Builds strong, healthy and vibrant turf
- Enhances root mass and growth
- Helps turf better withstand stress
- Delivers consistent results

Easy to Use

- Ready-to-use liquid formulation
- Compatible with most fungicides, insecticides and PGR's
- May applied using ground equipment, through fertigation or as a soil drench

Small particle size and low molecular weight allow nutrients to move to plant growth points quickly.

Guaranteed Analysis

Total Nitrogen (N)	5.00%
4.00% Nitrate nitrogen	
1.00% Urea nitrogen	
Magnesium (Mg)	1.20%
1.20% Water soluble magnesium	
Iron (Fe)	2.85%
2.85% Water soluble iron	
Manganese (Mn)	0.45%
0.45% Water soluble manganese	
Zinc (Zn).....	0.65%
0.65% Water soluble zinc	

Derived from potassium nitrate, urea, copper diammonium ethylenediaminetetraacetate (EDTA), iron EDTA and manganese EDTA. F76

Application and Use

MANNI-PLEX® should be applied to actively growing plants and turf throughout the year. For best results apply early morning or late evening.

Turf (Commercial):

Green & Tees: 2-5 fl oz per 1,000 sq ft.

Fairways & Sports Turf: 2.5-6.5 quarts per acre.

Overseeding: 2 fl oz per 1,000 sq ft after germination.

Sod Installation: 2 fl oz per 1,000 sq ft at installation.

For more information, see BRANDT's Summer/Winter Success Spray programs and always read full labels before use.
