Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility. Consult your local waste disposal regulations for instructions on proper method of disposal.

REFERENCES

NOTES TO VETERINARIAN

Intravenous administration of Vitamin K1 (5-10 mg/kg body weight) may stabilize coagulation defects. Administer as soon as possible. Unless there is a high risk of secondary hemorrhage, the patient may be treated on an outpatient basis. If there is a high risk of secondary hemorrhage, initiate therapy immediately and observe the patient for signs of hemorrhage.

NOTES TO PHYSICIAN

NOTE TO Pesticide Applicators

If the material at risk is the contents of a building or storage facility, consult your local emergency services or fire department for assistance. If the material at risk is a non-commercial building or storage facility, consult your local emergency services or fire department for assistance.

TREATMENT FOR PET POISONING

If a pet eats bait, consult your veterinarian or call the ASPCA Animal Poison Control Center at 1-888-426-4435.

EQUIPMENT

Personal Protective Equipment (PPE):
• Gloves
• Eye protection
• Respirators

ENVIRONMENTAL CONSIDERATIONS

This product is extremely toxic to mammals, birds and other wildlife. Soak, wash, and other procedures and equipment or materials that have been exposed to this product with hot water. Do not apply directly to water, to areas where surface water is present, or to the areas before high water levels. Do not contaminate water, wells, or any other source of drinking water.
