• Station is Child & Dog Resistant
• Can Be Used Indoors & Out
• 4 oz of Bait Pre-loaded Into Station

DIRECTIONS FOR USE

SELECTION OF TREATMENT AREAS:
Determine areas where rats and/or house mice will most likely find and consume the bait. Generally, these areas are beside burrows, along and around building foundations with all use instructions and precautions inscribed on the label. Do not place the bait stations in any area where from 3 to 5 feet of the bait station is accessible to children and dogs.

SELECTED TREATMENT AREAS:
Common areas where rats and/or house mice will most likely find and consume the bait. Generally, these areas are beside burrows, along walls, in ground spngs, in corners, and concealed places.

APPLICATION INSTRUCTIONS:
Place the TOMCAT® RAT KILLER bait stations at highest point of activity behind loose floor and walls, along and around burrows where rats and/or house mice will most likely find and consume the bait. Generally, these areas are beside burrows, along walls, in ground spngs, in corners, and concealed places. If additional units are purchased, place bait stations at 15 to 30 foot intervals. Maintain a constant supply of fresh bait for 10 days or until signs of rat or mouse activity cease in the area. Regularly check stations, notes of exact bait locations and amount used to determine if sufficient bait is remaining. Additional stations may be needed to ensure that all areas are treated. Use only for the sites, pests and application methods described on this label.

CONTAINER HANDLING:
This product is extremely toxic to fish, birds and other wildlife. Dogs and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply this product directly to water. This is a nonrefillable container. Do not reuse or refill this container. This is a nonrefillable container. Do not reuse or refill this container.
