

BRANDT T.A.C.

Copper Algaecide and Bactericide

BRANDT T.A.C. is a proprietary solution designed with the aquatic ecosystems in mind. This high-performance algaecide and bactericide is expertly formulated for effective management of lakes, ponds, and reservoirs. Whether you're looking to eradicate algae, sludge, or dissolve surface mats, BRANDT T.A.C. offers both. It's designed to target a wide range of aquatic nuisances including filamentous and planktonic algae, chara, nitella, pithophora, as well as cyanobacteria such as blue-green algae and lyngbya. This product is OMRI Listed.

BRANDT T.A.C Advantages

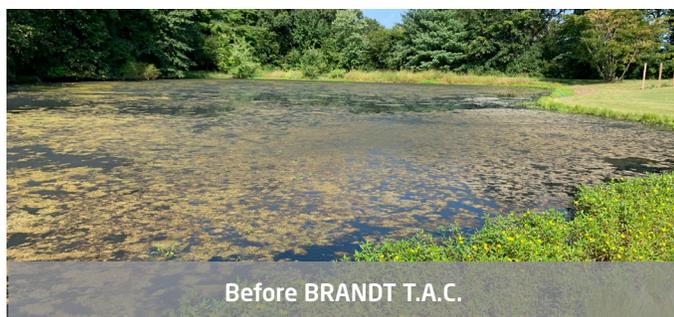

- Low pH .05%
- Ready to use, no mixing
- Provides up to 30 days control
- No carcinogenic disinfection by-products.
- Apply late spring, early summer (temps above 60 degrees).
- EPA Registered
- Curative and preventative

Testimonials

"Algae blooms are one of the biggest challenges for lake management in South Florida. Thankfully, our applicators began using BRANDT TAC a couple of years ago. It is, without a doubt, one of the most valuable tools in our toolbox. For years we have been using the same algaecides with varying degrees of success, but TAC is the game changer we have been waiting for. It's effective on many different strains of algae and extremely cost effective. Anyone not using this is truly missing the boat on one of the best products available." - Andy Fuhrman, Vice President at Allstate Resource Management

"For two decades, my pond was covered with moss and algae. But after just two easy applications of BRANDT TAC, it's now the clearest I've ever seen it since it was put in. Each treatment was straightforward and took less than an hour, making me wonder why I hadn't done this sooner." - Kenny Young, BRANDT TAC user, Location: Mt. Olive, IL

"I have been working in lake and pond management for 26 years. I have had the opportunity to use many of the products on the market. With so many years of experience I have figured out what works and what doesn't. BRANDT TAC has been a go to for us for a number of years. It has helped out a lot with staying in control of the algae. It is more user friendly than some of the other products on the market and is also OMRI listed, which is a plus. BRANDT TAC works well on many kinds of algae." - Bobby Cordle, Assistant Property Director, San Destin Owners Association

Before BRANDT T.A.C.

Active Ingredient

Copper Sulfate Pentahydrate**	20.0%
Inert Ingredients	80.0%
Total	100.0%

** Metallic copper equivalent = 5.0%.
