

BRANDT® Plant Start

Amino Acid Based Plant Starter

BRANDT Plant Start is a high Phosphorous solution formulated to aid in the growth of roots and assist plants in overcoming stressful conditions.

BRANDT Plant Start is formulated containing natural plant hormone precursors, natural plant amino acids, plant vitamins and anti-stress substances derived from cold-pressed kelp extract. This combination promotes early growth and healthy root systems which will establish the plant quicker and in turn, promote vigorous top growth. BRANDT Plant Start2 is recommended for use as a supplement to a well balanced fertilizer program.

Made from the highest quality nutrient sources, BRANDT Plant Start provides a quality source of quickly available nitrogen promoting healthy top growth while the Phosphorous and Potassium are readily available to ensure strong rooting.

BRANDT Plant Start is non-clogging and non-abrasive to equipment. It is compatible with most fungicides, herbicides, and insecticides however compatibility tests are recommended.

BRANDT Plant Start Advantages

- Contains cold-pressed kelp extract for enhanced quick rooting
- Contains auxins and other plant hormones
- Significantly reduces the effects of transplant shock

Guaranteed Analysis

8-27-2

Total Nitrogen (N)	8.0%
8.0% Ammoniacal nitrogen	
Available Phosphate (P ₂ O ₅)	27.0%
Soluble Potash (K ₂ O)	2.0%
Molybdenum (Mo)	0.001%
0.001% Water soluble molybdenum	

Derived from ammonium phosphate, potassium polyphosphate, sodium molybdate and seaweed extract (*Ascophyllum nodosum* and Potassium Hydroxide*)
* Potassium Hydroxide as an extraction agent.

Application and Use

Field, Row and Vegetable Crops: Use 3-4 quarts per acre in planting or transplant water applied with seeder, plug mix or transplant machine.

Fruit, Tree and Vine Crops: Mix 2-3 quarts in 100 gallons of water. Use 1 gallon of solution to each tree at time of planting. For larger trees and shrubs, use 1 gallon of solution for each inch of trunk diameter.

Ornamentals: Mix 1-2 quarts in 100 gallons of water and apply as a drench for seedlings and transplants.

Turf: Greens and Tees – Newly seeded or grow-in – Use 1 quart per 10,000 sq ft in at least 10 gallons of water and repeat as needed. To deliver 1/2 lb of phosphorus per 1,000 sq ft – Mix 1 pint in sufficient volume of water and repeat as needed to enhance rooting. **Hydroseeding** – Mix at above rates with seed slurry mixture for ease of application.

Foliar Application: Use 2-4 quarts per 100 gallons of water. Cover foliage thoroughly to point of runoff

See product label for complete instructions.
