

BRANDT® Humic 12

Liquid Humic Acid

BRANDT Humic 12 is a concentrated humic acid formulation designed to support nutrient availability and soil health in turf and ornamental systems. With 12% humic acid derived from leonardite, this product enhances micronutrient uptake, improves soil structure, and promotes vigorous plant growth. Ideal for use in renovation, maintenance, and overseeding programs, BRANDT Humic 12 integrates easily into existing fertility plans and is compatible with most fertilizer and micronutrient products.

BRANDT Humic 12 Advantages

- Contains 12% humic acid derived from leonardite
- Promotes micronutrient uptake and improved soil activity
- Ideal for turf renovation, maintenance, and overseeding programs
- Compatible with most fertilizers and micronutrient blends
- Enhances nutrient availability and stress resilience in ornamental plants and turfgrass
- Low-alkaline formulation; may help balance tank mix pH

Guaranteed Analysis

0-0-3

Soluble Potash (K₂O) 3.0%

Derived from potassium hydroxide.

ALSO CONTAINS NONPLANT FOOD INGREDIENT:

12% Humic Acid derived from Leonardite

Humic acid analyzed by acid precipitation method.

Application and Use

Fine Turf (Warm or Cool Season Turfgrasses):
For professional use, apply every 14-28 days, as needed.

Putting Greens and Tees:
Maintenance: 4-6 fl oz per 1,000 sq ft or 1.25-2 gal per acre.
Renovation: 6-12 fl oz per 1000 sq ft or 2-4 gal per acre.
Overseeding: 4-6 fl oz per 1,000 sq ft or 1.25-2 gal per acre, applied every 14-28 days after germination and plants have reached the 3 tiller phase. Most effective when used as part of an overall overseeding nutritional program.

Fairways, Sports Turf and Lawns:
Maintenance: 9-12 fl oz per 1,000 sq ft or 3-4 gal per acre.
Renovation: 6-12 fl oz per 1000 sq ft or 2-4 gal per acre.
Overseeding: 9-12 fl oz per 1,000 sq ft or 3-4 gal per acre, applied every 14-28 days after germination and plants have reached the 3 tiller phase. Most effective when used as part of an overall overseeding nutritional program.

Ornamental Plants: Tree and Shrub maintenance: For deep root feeding inject 1-3 gal per 100 gal of water per inch of trunk diameter at chest height. Apply 2-5 gal per 100 gal of water as a drench. Apply drench throughout the year or during drought stress conditions.
