

BRANDT® Plant Start

Amino Acid Based Plant Starter

BRANDT Plant Start is a high phosphorous solution formulated to aid in the growth of roots and assist plants in overcoming stressful conditions.

BRANDT Plant Start is formulated containing natural plant hormone precursors, natural plant amino acids, plant vitamins and anti-stress substances derived from cold-pressed kelp extract. This combination promotes early growth and healthy root systems which will establish the plant quicker and in turn, promote vigorous top growth. BRANDT Plant Start is recommended for use as a supplement to a well balanced fertilizer program.

Made from the highest quality nutrient sources, BRANDT Plant Start provides a quality source of quickly available nitrogen promoting healthy top growth while the phosphorous and potassium are readily available to ensure strong rooting.

BRANDT Plant Start is non-clogging and non-abrasive to equipment. It is compatible with most fungicides, herbicides, and insecticides however compatibility tests are recommended.

BRANDT Plant Start Advantages

- Contains cold-pressed kelp extract for enhanced quick rooting
- Contains auxins and other plant hormones
- Significantly reduces the effects of transplant shock

Application and Use

Fine Turf (Warm or Cool Season Turfgrasses)

For professional use, apply every 14-28 days, as needed.

Putting Greens and Tees

Maintenance: 3-9 fl oz per 1,000 sq ft or 1-3 gal per acre.

Overseeding: 3-9 fl oz per 1,000 sq ft or 1-3 gal per acre, applied every 14-28 days after germination and plants have reached the 3 tiller phase. Most effective when used as part of an overall overseeding nutritional program.

Guaranteed Analysis

8-27-2

Total Nitrogen (N)	8.0%
8.0% Ammoniacal nitrogen	
Available Phosphate (P_2O_5)	27.0%
Soluble Potash (K_2O)	2.0%
Molybdenum (Mo)	0.001%
0.001% Water soluble molybdenum	

Derived from ammonium phosphate, potassium polyphosphate, sodium molybdate and seaweed extract (*Ascophyllum nodosum* and Potassium Hydroxide*)
* Potassium Hydroxide as an extraction agent.

Fairways, Sports Turf and Lawns

Maintenance: 6-12 fl oz per 1,000 sq ft or 2-4 gal per acre.

Overseeding: 3-9 fl oz per 1,000 sq ft or 1-3 gal per acre, applied every 14-28 days after germination and plants have reached the 3 tiller phase. Most effective when used as part of an overall overseeding nutritional program

Ornamental Plants

Tree and shrub maintenance: For deep root feeding inject 0.5-1 gal per 100 gal of water per inch of trunk diameter at chest height. Apply 1-2 gal per 100 gal of water as a drench. Apply drench throughout the year or during drought stress conditions.

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.
