Application and Use

For Use as a Water Conditioner (Ground or Air): This product provides 8.5 to 17 pounds ammonium sulfate when used at a rate of 2.5 to 5 gallons per 100 gallons of finished spray solution. For improved efficacy, use at least 2 quarts per acre when finished spray volume is less than 20 gallons per acre.

For Use as a Fertilizer: Use 1-2 quarts per 10-20 gallons of water per acre per application.

Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.
