

# BRANDT® MicroSURGE® Soybean High Performance Seed Inoculant

BRANDT MicroSURGE Soybean delivers high-quality microbials designed to support early establishment and consistent nodulation. This product introduces beneficial microorganisms to the seed that supports nitrogen fixation and early root development during critical early growth stages.

Formulated with shield technology, BRANDT MicroSURGE Soybean is designed to help protect microbial viability through shelf life, handling, and application, supporting consistent coverage and performance through the planting process.

## Key Benefits of BRANDT MicroSURGE

- Delivers rhizobia that support early nodulation and nitrogen fixation
- Promotes strong early root development to support nutrient uptake throughout the growing season
- Supports uniform plant establishment and early-season vigor
- Shield protection technology helps maintain microbial viability
- Flexible application options for seed treatment and liquid systems

## Planter Box Application

### BRANDT MicroSURGE Dry Soybean Inoculant Guaranteed Analysis

*Bradyrhizobium japonicum* ..... 2x10<sup>5</sup> cfu/gram

## Application and Use

This product is designed only to be mixed with BRANDT's 20 lb pail of 80/20. Add 5 lbs or one full container of BRANDT MicroSURGE Dry Soybean Inoculant to BRANDT's 20 lb pail of 80/20. Mix or shake thoroughly before use. Treats approximately 10 units of seed at 140,000 seeds per unit. Use labeled rate on 20 lb pail.

## Seed Treater Application

### BRANDT MicroSURGE Liquid Soybean Inoculant ST Guaranteed Analysis

*Bradyrhizobium japonicum* ..... 1x10<sup>9</sup> cfu/ml

## Application and Use

Shake well before use. Ensure treater is properly calibrated. Apply BRANDT MicroSURGE Liquid Soybean Inoculant directly into the tank mix. Prepare only as much as needed for that day. Plant seed as soon as possible after seed is treated. If planting window becomes larger than 90 days reapply.
