

BRANDT Smart Sulfur Plus

Advanced Nutrient Delivery Technology

BRANDT Smart Sulfur Plus is a high-sulfur foliar nutrient built on proven BRANDT® Smart System® technology. This 5-0-0 formulation delivers sulfur along with a balanced blend of boron, manganese, molybdenum and zinc through a protected delivery platform designed to improve nutrient uptake and in-plant mobility. Engineered for use in complex tank mixes, BRANDT Smart Sulfur Plus helps ensure nutrients remain available in the spray solution and efficiently reach the crop's growing points to support in-season performance.

Key Benefits of BRANDT Smart Sulfur Plus

- **Protected Nutrient Delivery:** Smart System technology helps prevent nutrient tie-up in the tank, supporting consistent delivery into the plant
- **Targeted Nutrient Support:** Provides sulfur and key micronutrients to support metabolic function, plant structure and overall development
- **Enhanced Uptake and Mobility:** Designed to improve foliar absorption and support movement to active growing points
- **Tank Mic Compatible:** Low salt index formulation designed for complex tank mixes to support crop safety and consistent nutrient delivery

Guaranteed Analysis

5-0-0

Nitrogen (N)	5.0%
5.0% Urea nitrogen	
Sulfur (S)	5.0%
Boron (B)	0.5%
Manganese (Mn)	1.5%
Molybdenum (Mo)	0.05%
Zinc (Zn)	1.5%

Plant Nutrient Functions

The nutrient combination was selected to support key physiological processes in crops:

Boron: Supports plant structure and flexibility while contributing to vegetative and reproductive growth

Manganese: Supports chlorophyll production and photosynthesis, contributing to overall plant energy and function

Molybdenum: Supports nitrogen utilization and root nodulation processes

Sulfur: Supports protein and enzyme synthesis essential for plant growth and development

Zinc: Plays a key role in root and shoot growth and supports plant response to environmental stress

Application Recommendations

Field, Row, Vegetable and Vine Crops: Apply 1-2 quarts per acre per application throughout the growing season. More frequent applications at 1 pint per acre may be needed to correct deficiencies once they occur.
