

BRANDT Smart K B

Advanced Nutrient Delivery Technology

BRANDT Smart K B is a foliar potassium formulation built on proven BRANDT® Smart System® technology. This 2-0-16 solution delivers potassium alongside boron and molybdenum through a protected delivery platform designed to improve nutrient uptake and mobility within the plant. Engineered for use in complex tank mixes, BRANDT Smart K B helps ensure nutrients remain available in the spray solution and efficiently reach the crop's growing points to support in-season performance.

Key Benefits of BRANDT Smart K B

- **Protected Nutrient Delivery:** Smart System technology helps prevent nutrient tie-up in the tank, supporting consistent delivery into the plant
- **Targeted Nutrient Support:** Provides highly available K, B and Mo to support plant strength, nutrient movement, and reproductive development
- **Enhanced Uptake and Mobility:** Designed to improve foliar absorption and support movement to active growing points
- **Tank Mix Compatible:** Low salt index designed for complex tank mixes to support crop safety and consistent nutrient delivery

Plant Nutrient Functions

The nutrient combination was selected to support key physiological processes in crops:

Potassium: Supports water regulation, stress tolerance, and overall plant strength while contributing to yield potential

Boron: Supports new growth, pollination, and reproductive development while contributing to plant structure and nutrient utilization

Molybdenum: Supports nitrogen utilization and metabolic processes

Guaranteed Analysis

2-0-16

Nitrogen (N)	2.0%
2.0% Urea nitrogen	
Soluble Potash (K ₂ O).....	16.0%
Boron (B)	2.5%
Molybdenum (Mo)	0.2%

Application Recommendations

Field, Row, Vegetable and Vine Crops: Apply 1-2 quarts per acre per application throughout the growing season. More frequent applications at 1 pint per acre may be needed to correct deficiencies once they occur.

Aerial (plane, helicopter & drone) Applications: Apply 1-2 pints per acre. When applying fungicide and insecticide chemistries be sure there is sufficient water volume to properly disperse products.

Disperse suspension concentrate and emulsion concentrate based products prior to adding BRANDT Smart K B.
