

# BRANDT® EnzUp® Grain ST

## Enzyme Seed Treatment with Zinc

BRANDT EnzUp Grain ST is a seed-applied enzyme and micronutrient formulation built on patented BRANDT EnzUp technology. It delivers targeted enzymes and zinc directly to the seed to support nutrient availability and early root-zone activity by breaking down complex organic materials in the soil. This process helps release nutrients for plant uptake while supporting early root development and microbial activity. Designed for use as a seed treatment or in-furrow application, it integrates into existing seed treatment programs.

### Patented Enzyme Technology

Targeted enzymes are delivered into the root zone, where they interact with root exudates and the surrounding soil environment. These enzymes help break down complex organic materials, supporting the release of nutrients and improving their availability for plant uptake. This activity also contributes to movement of water and nutrients toward the root surface, supporting early root development and overall rhizosphere function.

### Guaranteed Analysis

Zinc (Zn)..... 4.0%  
4.0% Chelated zinc

Derived from zinc EDTA.

### ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

Lipase.....  $3.2 \times 10^3$   $\mu$ Units/mL  
Mannanase.....  $1.6 \times 10^6$   $\mu$ Units/mL

### Rate Recommendations:

Seed Treatment	In-Furrow/Banded
Wheat and Rice: 2 fl oz/cwt	Field and Row Crops: 2 fl oz/ac
Corn: 4 fl oz per unit of seed	Potato: 4-6 fl oz/ac

- ✓ May be mixed with and applied with fungicide and insecticides
- ✓ Can be applied as an overcoat treatment
- ✓ Compatible with most inoculants and microbial based products

### Benefits of Zn

Provides high quality, readily available Zn to the seed. This promotes root and shoot growth and helps plants withstand environmental stress.
