

Brandt® 719 Spreader

Penetrant • Wetting Agent • Spreader

Principal Functioning Agents:

Polyoxyethylene-polyoxypropylene polymer,
methylated silicones 100%

CA Reg. No. 48813-50027-AA

DIRECTIONS FOR USE

BRANDT 719 SPREADER is a patented proprietary trisiloxane alkoxyate based wetting agent for use in pesticide spray applications. This non-ionic surfactant may be used to improve both spray coverage and uptake of spray solutions used on agricultural, forestry, turf and ornamental, industrial, and non-cropland sites. Not for aquatic use.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with BRANDT 719 SPREADER. Use according to the most restrictive label directions for each product in any tank mix.

COMPATIBILITY: BRANDT 719 SPREADER is compatible with most pesticides, however it will break down when mixed with highly acidic (below pH 4) or highly alkaline (above pH 9) chemicals, which may result in poor wetting and spray coverage. If the desired combination has not been previously used, a compatibility test is recommended.

NOTE: Do not use BRANDT 719 SPREADER in spray tank mixes with gibberellin or gibberellic acid products to be used on any citrus crop grown for fresh market.

MIXING: Fill spray tank 3/4 full of water and begin agitation. If foaming is expected, use an antifoaming agent, such as BRANDT ORGANICS DEFOAMER. Then add products as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersing granules, (2) Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Continue agitation until spray solution is completely mixed.

Add the recommended amount of BRANDT 719 SPREADER. Minimal agitation of finished spray is recommended. For optimum results, use the spray solution within 36 hours after mixing. If spray solution has been allowed to stand, thoroughly agitate and remix before application.

RECOMMENDATIONS: Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

As a Spray Adjuvant:

Ground: 6-64 fl. oz. per 100 gallons; adjust rate or water volume to obtain thorough coverage without excessive run-off.

Aerial: 1.6-3.2 fl. oz. per 5 gallons

As a Soil Wetting Agent:

Lawns and Turf: 0.05%-0.125% v/v concentration

Greens and Tees: 0.05%-0.125% v/v concentration

Deep Feeding Trees: 0.10%-0.20% v/v concentration

Important: Additional Operating Instructions for Chemigation. Review your state and local regulatory requirements before applying any pesticide, adjuvant or agricultural chemical through an irrigation system.

Refer to this product's SUPPLEMENTAL LABELING FOR CHEMIGATION APPLICATIONS for additional use requirements and restrictions (Washington State only) **found at:** <https://brandt.co/chemigation>

KEEP OUT OF REACH OF CHILDREN

WARNING

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes eye irritation. Harmful if inhaled. Wear protective eyewear, long sleeved shirt, long pants, shoes plus socks and chemical resistant gloves made of any waterproof material when mixing or handling concentrate. Avoid breathing vapors. Use only outdoors or in a well-ventilated area. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a poison control center or doctor if you feel unwell.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in closed, original container away from children, animals, foods, feeds and seeds. Handle in accordance with Precautionary Statements. In the event of spillage or leakage, soak up the material with absorbent clay, sand, sawdust or other absorbent material. Scrape up and dispose in accordance with Product Disposal.

PRODUCT DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
