BRANDT A+™
Spreader/Activator

BRANDT A+ is a proprietary non-ionic surfactant that has unique properties that reduce physical drift, and enhance spray application deposition and surface activity. It also promotes superior wetting, uptake and retention of many agrochemical sprays. BRANDT A+ may be used on agricultural, aquatic, forestry, turf and ornamental, and non-cropland sites.

BRANDT A+ is An Approved Tank Mix Partner for XtendiMax® and FeXapan™ Herbicides

BRANDT A+ has been approved as a tank mix partner for XtendiMax with VaporGrip® Technology and FeXapan with VaporGrip Technology when used in conjunction with a Drift Reducing Adjuvant as specified by Monsanto® and DuPont® (such as BRANDT ONSITE).

For more information on approved tank mix products, visit:

Principle Functioning Agents

Polyoxyethylene polyol fatty acid ester and
Fatty acid polyol esters 90%
Constituents Ineffective as Spray Adjuvant. 10%
Total 100%

Application Recommendations

Specific use rates will vary with conditions of application such as: water hardness; application method; equipment; spray droplet size; spray nozzle selection; or condition, size of foliage.

Ground: (10 to 300 GPA spray volume)

General Use: Apply 4-32 fl oz per 100 gallons of spray solution.

Drift Reduction: Apply 2-3 pints per 100 gallons of spray solution.

Aerial: Use 2-3 fl oz per 5 gallons of spray volume per acre.

*Always refer to tank mix approval lists and follow full label instructions before application.
