

**BRANDT® Smart Mn Plus™**

# Advanced Compatibility Foliar Nutrition

BRANDT SMART MN PLUS is a new high efficiency manganese formulation in the top-selling BRANDT SMART SYSTEM product line. It is a 5-0-0 with a high amount of manganese and a spike of sulfur. It is ideal for in-season nutrient applications on specialty crops and row crops.

## Benefits of Foliar Feeding

Foliar feeding is one of the most efficient ways to supply nutrition to crops during critical growth stages. Applying nutrition to plant leaves allows the plant to immediately absorb nutrients, which promotes better plant uptake, better overall plant health and increased yield potential.

## Key Benefits of BRANDT SMART MN PLUS

BRANDT SMART MN PLUS provides high quality, readily available nutrients to plants in a highly efficient and mobile form. **It is also formulated for superior tank mix compatibility with fungicides, insecticides, glyphosate and select dicamba herbicides.**

- Superior tank mix compatibility over a broad pH range
- Maximum nutrient mobility and efficiency, which allows for a lower application rate per acre
- Low salt index and low impurities
- Healthier plants, stress mitigation, enhanced quality and yield
- **BRANDT SMART MN PLUS is approved for use with Engenia® herbicide. For info, visit: [EngeniaTankMix.com](http://EngeniaTankMix.com)**

## Guaranteed Analysis

**5-0-0**

Nitrogen (N) .....	5.0%
5.0% Urea Nitrogen	
Sulfur (S) .....	2.0%
Manganese (Mn) .....	4.0%

Derived from urea and manganese sulfate

## Plant Nutrient Functions

The nutrient combination in BRANDT SMART MN PLUS was carefully selected and developed for specialty crops and row crops. The agronomic benefits of these nutrients include:

**Manganese:** aids in herbicide metabolism, chlorophyll formation and plant respiration. It is also critical to photosynthesis.

**Sulfur:** aids in protein and enzyme synthesis.

## Application Recommendations

**Field, Row, Vegetable and Vine Crops:** Apply 1 quart per acre per application throughout the growing season. More frequent applications at 1 pint per acre may be needed to correct deficiencies once they occur.
