

BRANDT® FertiGreen™

Superior Turfgrass Color and Performance

BRANDT FERTIGREEN is a dry water soluble fertilizer designed to enhance turfgrass color and quality, without promoting excess shoot growth. The formulation supplies highly available manganese and magnesium that enhances chlorophyll production and improves photosynthesis.

BRANDT FERTIGREEN Advantages

- Provides quick and rapid turf green-up
- Does not boost excess shoot growth
- Essential micronutrients help mitigate stress
- Compatible with most other pesticides and other fertilizers

Application and Use

For professional use on actively growing turf, apply 4-12 lb BRANDT FERTIGREEN per acre (1.5-4.5 oz per 1000 sq ft) monthly, or as needed. Use a minimum of 88 gal of water per acre (2 gal per 1000 sq ft) to ensure adequate coverage. For best results, apply early morning or late afternoon

Guaranteed Analysis

Magnesium (Mg)	2.0%
Sulfur (S)	13.0%
Iron (Fe)	15.0%
Manganese (Mn)	4.0%

Derived from magnesium sulfate, ferrous sulfate, manganese sulfate.
