Zinc (Zn)	2.20%
2.20% Chelated zinc	

Derived from calcium EDTA, magnesium EDTA, sodium borate, copper EDTA, iron EDTA, manganese EDTA and zinc EDTA. F76

General Information

BRANDT SEQUESTAR BERRY MIX is a fully chelated, water soluble, powdered form of EDTAs. Although formulated specifically for berries, this product may be used on all field, row, vegetable, fruit, tree and vine crops for prevention and correction of micronutrient deficiencies. The preferred use is as a soil application to prevent the deficiency although it may also be used as a foliar spray to provide correction when a soil application is impractical.

Directions For Use

Soil Application: BRANDT SEQUESTAR BERRY MIX is recommended for use on all types of soils. To ensure uniform coverage, this product should be dissolved in water or fluid fertilizer, or dry blended with water soluble fertilizers for band, sidedress, or broadcast applications. For trees or individual plants, the chelate may be blended with an inert (such as soil or sand) or sprinkled directly on the soil uniformly under the plant's drip line, then watered in. Soil applications may also be made by dissolving in water and then mixing or metering into drip, sprinkler or furrow irrigation systems.

Field, Row And Vegetable Crops:	Up to 15 pounds per acre.
Fruit And Tree Crops:	Up to 20 pounds per acre.
Vines:	1/2 to 1 pound per 100 feet of vine row.

The rates given in the table above are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.

Net Weight: 25 lb / 11.3 kg
21010BRN025 2018-08
LOT #

Aerial Application: Apply 1/3 pound of BRANDT SEQUESTAR BERRY MIX per acre in at least 10 gallons of water. For application timing and frequency, refer to appropriate foliar application recommendation.

Foliar Application: BRANDT SEQUESTAR BERRY MIX may be applied in water or in combination with most pesticides. After the correct dilution has been made, the spray solution should be buffered to pH 6-6.5. Thorough coverage and the use of wetting agents often enhance nutrient uptake from foliar sprays. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed and the application method. Avoid applying this product when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application.

All Crops:	1/2 to 1 pound per acre.
-------------------	--------------------------

Multiple chelate applications should be made at no less than 10 to 14 day intervals to reduce the potential for crop injury.

ATTENTION: This product contains boron; use on any crops other than those recommended may result in serious injury to the crops.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.html>

Information about the components of this lot of fertilizer may be obtained by writing to Brandt Consolidated, Inc. and giving the lot number which is found on the container or label.

WARNING: Suspected of damaging fertility or the unborn child.

Precautionary Statements: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/clothing and eye/face protection. **First Aid:** If exposed or concerned, get medical attention. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store locked up. Dispose of contents/container in accordance with local regulations.
