

Brandt[®] Liquid Molybdenum

Micronutrient Supplement

Guaranteed Analysis

Molybdenum (Mo)..... 5.0%

Derived from sodium molybdate.

F76

General Information

BRANDT LIQUID MOLYBDENUM is recommended to prevent and correct molybdenum deficiencies of field, row, vegetable, fruit, tree, vine, legume and forage crops. Applied alone, with pesticides, or with other fertilizers, this product may be applied directly to the soil or to the foliage of growing crops via ground sprayers, aircraft or fertigation systems.

Rate Recommendations

Foliar Application: Actively growing plants with young leaves absorb foliarly applied BRANDT LIQUID MOLYBDENUM most efficiently. Immediate post-irrigation or post-rainfall application will enhance foliar uptake. Thorough coverage and wetting are needed for optimum foliar spray results.

Applications should be separated by a minimum of 7-14 days. AVOID foliar applications of this product when plants are under moisture stress. AVOID foliar applications to deciduous tree crops during bloom.

Dilute: For rates higher than 1.5 pints per acre, split applications of 1.5 pints or less are preferred to minimize phytotoxicity.

Concentrates: Use up to 1.5 pints in a minimum of 25 gallons of water per acre.

Aerial: Up to 1.5 pints per 5 gallons of spray may be used, but more dilute solutions will improve coverage and results.

Soil Application: The lower rates are for field, row and vegetable crops. The higher rates are for fruit, tree and vine crops.

Soil Fertility Maintenance 0.5-1 pint/acre

Mild Deficiency 1-2 pints/acre

Severe Deficiency 2-3 pints/acre

Fertigation: Apply the recommended amount of product in split applications 1-2 weeks apart throughout the growing season.

Net Contents: 2.5 gallons (9.64 liters)

Density: 9.2 lb/gal @ 68°F

Net Weight: 22.7 lb (10.2 kg)

Packaged: 2 x 2.5 gallons (2 x 9.64 liters)

32024BRN100
2018-08

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

Mixing and Handling Instructions

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

Information about the components of this lot of fertilizer may be obtained by writing to Brandt Consolidated, Inc. and giving the lot number which is found on the container or label.

ATTENTION: The application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.

Precautionary Statements: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.
