

Pendulum® AquaCap™

Preemergent Weed Control for Turf and Landscape

PENDULUM AQUACAP herbicide encapsulates a water-based formulation of the active ingredient BASF pendimethalin in an ultra-thin capsule. PENDULUM AQUACAP offers a unique combination of benefits that make it the perfect preemergent weed control solution for golf courses, commercial and residential lawn care.

Pendulum AquaCap Advantages

- Virtually no odor
- Reduced staining potential
- Increased ease and flexibility of handling, mixing and cleanup
- Improved storage stability and environmental profile

Controls Crabgrass And More

PENDULUM AQUACAP offers unbeatable control of 21 of the most common unwanted grasses and 25 of the most troublesome broadleaf weeds, including: Field Sandbur, Filaree, Wolly Cupgrass, Puncturevine, Lawn Burnweed, Hop Clover, Pennsylvania Smartweed, Annual Spurge, Cudweed, Chickweed, Evening Primrose, Yellow WoodSorrel, and Fiddleneck.

Keys to Success

- Uniform coverage prior to germination and emergence is essential
- Weed control efficacy is improved if application is followed by one inch of rain or its equivalent

Recommended and Tested

PENDULUM AQUACAP is approved for use on a broad spectrum of vegetation, including more than 95 varieties of shrubs, 100 types of trees and several ground covers, perennials and ornamental grasses.

Active Ingredients

Pendimethalin: N-(1-ethylpropyl)-3,4-dimethyl-2,6 dinitrobenzenamine	38.7%
Other Ingredients	61.3%
Total	100.0%

1 gallon contains 3.8 lbs of microencapsulated pendimethalin in an aqueous carrier. EPA Reg. No. 241-416

Application and Use

Can be applied in single and split applications from 1-3 lbs/ac for control of grass and broadleaf weeds prior to germination in sites such as:

- Residential and commercial turfgrass
- Landscape ornamental beds
- Golf course fairways
- Roughs and common areas
- Cemeteries
- Industrial sites
- Non-cropland areas of vegetation management and on turfgrasses grown on sod farms

Uniform coverage prior to germination is essential for effective use. Weed control efficacy is improved if application is followed by one inch of water. As little as 10 gallons and up to 200 gallons per acre spray solution can be used.
