

Brandt AdjuLock®

Drift Reduction Agent • Water Conditioner • Surfactant

Principal Functioning Agents:

Trisodium citrate dihydrate, Alkyl polyglucoside, Diethylene glycol and Polyacrylamide	34.75%
Constituents ineffective as spray adjuvant	65.25%
Total	100.00%

KEEP OUT OF REACH OF CHILDREN WARNING

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes eye irritation. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Do not store below 39°F. Non-refillable container. Do not reuse or refill this container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

DIRECTIONS FOR USE

BRANDT ADJULOCK is a multi-purpose adjuvant that reduces drift-able fines and improves the wetting and spreading properties of the tank mix. It is formulated with a non-AMS water conditioner to enhance the performance and consistency of post emergent herbicides by reducing or eliminating the tie-up of anionic herbicides with metal cations present in hard water such as calcium (Ca), magnesium (Mg) and iron (Fe). It may be used on agricultural, forestry, turf and ornamental, industrial and non-cropland sites.

COMPATIBILITY: BRANDT ADJULOCK is compatible with most water-soluble, emulsifiable concentrate, suspension concentrate, water dispersible granule, and wettable powder pesticides when applied by aerial or ground equipment. However, if the desired combination or order of addition has not been previously used, a compatibility test is recommended. Refer to the individual websites for Engenia®¹, FeXapan™, and Xtendimax® for approved tank mix partners.

MIXING: Put 1/3 to 2/3 of total desired water volume in tank. Add BRANDT ADJULOCK and agitate until thoroughly mixed. Add pesticide(s) and other chemicals and agitate until thoroughly mixed. Fill tank with remainder of desired water.

RECOMMENDATIONS: Do not use this product at a rate to exceed 1% v/v of finished spray tank mixture.

For Use As a Drift Reduction Agent for Dicamba Tank Mixes: Use 5 pints per 100 gallons of spray mixture. Not for aerial application. Refer to individual product labels for specific directions.

For General Use as a Drift Reduction Agent: Use 2 to 3 quarts per 100 gallons in the spray mixture.

For Use As a Water Conditioner: Use 2 to 4 quarts per 100 gallons of spray mixture (0.5% v/v to 1.0% v/v).

WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
