

BRANDT® 719 Spreader

Non-Ionic Organosilicone Penetrant and Wetting Agent

BRANDT 719 SPREADER is a proprietary non-ionic trisiloxane alkoxylate based wetting agent. It's unique trisiloxane surfactant and co-polymer formulation is designed to prevent quick evaporation and run-off problems associated with some organosilicone based wetting agents. BRANDT 719 SPREADER can be used at much lower rates than conventional non-ionic surfactants.

BRANDT 719 SPREADER Advantages

- Improves spray droplet adhesion to lower pesticide wash-off and waste concerns
- Excellent penetration properties provide better uptake of systemic agrochemicals
- Superspreading for exceptional spray coverage of hard to wet plant surfaces
- Versatile for use with a broad range of agrochemical applications
- Adjuvant technology developed thru US Patent No. 5,104,647

Principal Functioning Agents

Polyoxyethylene-polyoxypropylene polymer, methylated silicones100%

CA Reg No. 48813-50027-AA

Application Rates

Specific use rates will vary with conditions of application such as the method chosen, spray volume, nozzle selection or foliage variances.

Application Method	Rate
Ground	6-64 fl oz (0,2-1,9 L) per 100 gallons (378 L) of spray solution. Adjust the rates of BRANDT 719 SPREADER or water volumes to obtain thorough coverage without excessive run-off.
As a soil wetting agent	Lawns and turf: 0.05%-0.125% v/v concentration Greens and tees: 0.05%-0.125% v/v concentration Deep feeding trees: 0.10%-0.20% v/v concentration

Refer to this product's SUPPLEMENTAL LABELING FOR CHEMIGATION APPLICATIONS for additional use requirements and restrictions (Washington State only) found at: <https://brandt.co/chemigation>

Always read and follow all label instructions before application.
