BRANDT® 719 Spreader
Non-Ionic Organosilicone Penetrant and Wetting Agent

BRANDT 719 SPREADER is a proprietary non-ionic trisiloxane alkoxylate based wetting agent. Its unique trisiloxane surfactant and co-polymer formulation is designed to prevent quick evaporation and run-off problems associated with some organosilicone based wetting agents. BRANDT 719 SPREADER can be used at much lower rates than conventional non-ionic surfactants.

BRANDT 719 SPREADER Advantages

- Improves spray droplet adhesion to lower pesticide wash-off and waste concerns
- Excellent penetration properties provide better uptake of systemic agrochemicals
- Superspreading for exceptional spray coverage of hard to wet plant surfaces
- Versatile for use with a broad range of agrochemical applications
- Adjuvant technology developed thru US Patent No. 5,104,647

Principal Functioning Agents

Polyoxyethylene-polyoxypropylene polymer, methylated silicones ........................................... 100%

Application Rates

Specific use rates will vary with conditions of application such as the method chosen, spray volume, nozzle selection or foliage variances.
